

Advocates of a new broadcast service known as Low Power FM (LPFM) are proposing to expand this service in a way that would allow the new LPFM stations to take priority over current FM translator service. We are bringing this to your attention because Airl is a national and regional broadcaster with many local FM translators used to bring the Positive Alternative Airl signal to communities across the nation. What this means to you is that you may lose your local Airl FM Radio service!

After reading the above message I feel that I need to express my displeasure at the prospect of losing Airl radio station that I listen to because of you (FCC) changing the FM broadcast priority. Airl plays positive alternative music that provides a great community service that gives people a choice to listen to commercial free, non-vulgar and profane music that actually helps people. Please do not do this and subject us to Howard Stern style radio.

Thanks For Your Consideration

Gary Alger
